# Say Goodbye to Geese

Your Solution for a Peaceful Property

Away With Geese features an amber 360° solar-powered light that flashes every two seconds, all night, year-round. The light is scarcely noticeable to humans but is very disruptive to the sleep of the geese, causing them to no longer feel secure. After just a few anxious nights, they find another habitat. There is an Away With Geese unit for every type of landscape.

## Solar Powered Light

The subtle flash comes on in the evening to disturb geese throughout the night, but not people or pets.

## Complete Coverage

The solar-powered flash reaches 100 yards in every direction, so that geese must fly away to feel secure and sleep.

## Humane For Geese

Our products offer a humane solution to goose problems. Though they annoy the geese enough to relocate, they have no ill effect on them.

## Satisfaction Guaranteed

Our units work, risk-free. We offer a money-back satisfaction guarantee after 90 days post purchase.

## Environment Friendly

Our units are long-lasting, environmentally friendly and have no impact on the natural landscape.

## Property Analysis

Get a **FREE** expert recommendation on placement, cost and number of units needed for your property, all via email.
